

LOI Fake

Dear Sir/Madam,

This Letter of Intent ("LOI") records the understanding reached between BOCA and Southern Jet Airways, in respect of the leasing of two (2) B777-300er aircraft (the "Aircraft") as more fully described below.

Lessor

Bank of China Aviation, and/or its subsidiary, affiliate, owner trust, assignee or nominee.

Lessee

Southern Jet Airways,

Aircraft and Delivery Dates

Airframe	Engines	MSN	Scheduled Delivery Month
B777-300er	GE90-115B	0001	Q4 2027
B777-300er	GE90-115B	0002	Q4 2027

The Aircraft shall be delivered "as is, where is" and as described in more detail in Appendix 1, Part A of this LOI.

Each Aircraft is currently leased to and operated by Aviator Airlines (the "Previous Lessee"). The parties acknowledge that the ability of Lessor to deliver the Aircraft to Lessee is subject to the redelivery of the Aircraft by the Previous Lessee on or about the expected delivery date.

The actual delivery date shall be the date of redelivery of the relevant Aircraft from the Previous Lessee (the "Delivery Date"). Lessor shall have no liability to Lessee if delivery of the Aircraft is delayed.

Inspection and Delivery

The Delivery Location shall be a location in Asia or such other location as Lessor may notify Lessee.

On or prior to the Documentation Execution Date, Lessee shall be entitled at its request to complete an initial inspection on the Aircraft and all associated technical records (the "Initial Inspection"). Lessor shall liaise with the Previous Lessee to facilitate each Initial Inspection. Any Initial Inspection shall be performed in the presence of Lessor (or its nominee) on terms permitted by the current lease agreement between Lessor and the Previous Lessee and shall not interfere with the Previous Lessee's use of the Aircraft.

On or prior to the Delivery Date, Lessee shall be entitled to complete a further inspection of the Aircraft in accordance with Appendix 1, Part B of this LOI (the "Delivery Inspection").

Lease Period

144 months.

Rent

Lessee shall pay Rent monthly in advance commencing on the Delivery Date.

Rent shall be US\$1,350,000 (one million three hundred fifty thousand delivery dollars) per month.

Security Deposit

Equivalent to 3 months' rent per Aircraft in cash payable by Lessee to Lessor as follows:

- (i) 1 months' Rent within three (3) days following signature of this LOI (the "LOI Deposit");
- (ii) 1 month's Rent upon signature of the Lease; and
- (iii) the balance payable no later than seven (7) days prior to the Delivery Date

No interest is payable on the Security Deposit and it may be co-mingled with Lessor's general funds and/or assigned or charged in connection with Lessor's financing of the Aircraft. The Security Deposit will be repaid to Lessee within 30 days of the expiry or

earlier termination of the Lease (the "Expiry Date"), subject to Lessee having complied with all of its obligations under the Lease.

Upon the occurrence of an Event of Default which is continuing, the Lessor may (in its absolute discretion) immediately or whenever it chooses, set-off against, use, retain, or apply all or any part of the Security Deposit in or towards the payment of discharge of any obligation of the Lessee or any affiliate of the Lessee.

Maintenance Payments

Maintenance Payments shall be payable in accordance with Appendix 2 (Maintenance Payments) of this LOI.

Rolls Royce TotalCare Agreement/LifeKey

Prior to the Delivery Date, it is intended that Lessee shall enroll each Engine into a LifeKey Compliant TotalCare agreement with Rolls-Royce plc ("RR") for the performance of Engine shop visits and certain other services (a "TotalCare Agreement"). If an Engine is not enrolled into a TotalCare Agreement, then the Lessee shall make Engine Maintenance Payments for the Lease Period.

Subject to there being no Default under the Lease and the Lessee having enrolled each Engine into a TotalCare Agreement, Lessor shall enter into a LifeKey Module Agreement in respect of each Engine which must be in form and substance satisfactory to the Lessor in its absolute discretion.

Lessee shall provide its consent in writing to RR and the Lessor to allow RR to disclose

to Lessor (i) on or prior to the enrolment of the Engines in the TotalCare Agreement, a

Total Care Agreement Summary (as defined below) and (ii) upon the fifth anniversary of

the Delivery Date, the Engine Performance Restoration Rate under the TotalCare

Agreement, to Lessor and thereafter annual statements confirming the total engine

restoration reserves held by RR under the Lessee Total Care Agreement as at such time
(the "Disclosure Authorisation").

Lessor shall suspend Lessee's obligation to make Engine Maintenance Payments during
the Lease Period for so long as the TotalCare Agreement, LifeKey Module Agreement
and Disclosure Authorisation (the "RR Documentation") remain in full force and effect
and there is no default under the TotalCare Agreement.

If at any time during the Lease Period (i) Lessor is notified of a default under the TotalCare
Agreement which results in the suspension of accruals under the LifeKey Module
Agreement for purposes of the calculation of the LifeKey cash and LifeKey credit, or (ii)
the RR Documentation is not in full force and effect, then Lessee shall commence
payment to Lessor of the monthly Engine Maintenance Payments in accordance with
Appendix 2 and in addition a supplemental Engine Maintenance Payment equal to the
amount required to bring the balance of each notional account to the balance which would
have been standing in such account had Engine Maintenance Payments been payable
from the Delivery Date (taking into account any applicable adjustment and escalation and
any Qualifying Work for which a contribution could have been claimed in accordance with
Appendix 2).

"TotalCare Agreement Summary" means the summary of the coverage and term of the
TotalCare agreement including the following information:

- (a) Airline Customer's name;
- (b) Engine type;
- (c) Engine serial numbers;
- (d) Name, date and reference of Airline Customer's TotalCare Agreement;
- (e) Period of Cover of Airline Customer's TotalCare Agreement;
- (f) Definition of Qualified Event;
- (g) TotalCare Services provided by Rolls Royce under Airline Customer's TotalCare Agreement; and
- (h) Differences in the Airline Customer's Engine Management Plan from the generic RollsRoyce Engine Management Plan.

Maintenance

Lessee shall be responsible for all maintenance, inspections, repairs and modifications required for the Aircraft during the Lease Period and at redelivery.

The Aircraft shall be maintained in accordance with Lessee's maintenance program, which shall be in accordance with the maintenance program specified in the Manufacturer's Maintenance Planning Document, as approved by the Aviation Authority and acceptable to Lessor. The maintenance performer for the Aircraft, Engines and Parts shall be acceptable to Lessor and shall hold the appropriate FAA and/or EASA Part 145 approvals to carry out the required work (the "Acceptable Maintenance Performer").

All repairs to the Aircraft, Engines, and Parts, and materials associated with such repairs, must meet the applicable OEM standards and specifications. All Parts that are installed on the Aircraft or Engines during the Lease Period must meet the applicable OEM standards and specifications.

Aircraft Documents

Lessee shall maintain all technical records, manuals and documents associated with the

Aircraft, Engines and Parts (the "Aircraft Documents") in accordance with the requirements of:

- (i) the Aviation Authority;
- (ii) the Maintenance Programme, and
- (iii) the FAA, or EASA and EU Ops1, as applicable.

All Aircraft Documents shall be maintained in English. On the Expiry Date, all Aircraft

Documents shall be delivered or returned (as applicable) by Lessee to Lessor in the

format in which they were originally created.

Lessee authorises and consents to each manufacturer and its representatives providing

Lessor with information about the condition and maintenance of the Aircraft (including

any Aircraft Documents) held or generated by such manufacturer.

Redelivery Conditions

Lessee shall redeliver the Aircraft to Lessor on the Expiry Date in conformity with the

conditions outlined in Appendix 3 (Redelivery Conditions) of this LOI. The Lease will

include the complete redelivery procedures and conditions.

Redelivery Location

An Acceptable Maintenance Performer in Singapore or other such location agreed between Lessee and Lessor.

Registration

Throughout the Lease Period, the Aircraft will be registered with Civil Aviation Authority of Singapore (the "Aviation Authority") at Lessee's expense on terms satisfactory to Lessor. Lessee shall be responsible for all costs associated with

perfecting and recording Lessor's and any financing parties' interests in the Aircraft and/or the Lease in the state of registration and habitual base of the Aircraft, including the cost of legal opinions acceptable to Lessor. Lessee shall not change the state of registration of the aircraft without Lessor's consent.

If the Cape Town Convention is or becomes effective in Singapore or any other relevant jurisdiction, Lessee shall, at no cost to Lessor, take all steps possible to establish and register under such convention all international interests of Lessor, the relevant financing parties and Lessee in the Aircraft, the Lease, any permitted sub-lease and under any relevant financing or security documents and any assignments of such international interests and shall provide Lessor with an IDERA (Irrevocable De-registration and Export Request Authorisation) authorising Lessor or its nominee to deregister the Aircraft on the Expiry Date.

Subleasing

Lessee will not sublease the Aircraft without the prior written consent of Lessor. Any costs incurred by Lessor in connection with any proposed subleasing shall be for the account of Lessee.

Insurance

Lessee shall maintain, at its expense, hull all risks, hull war risks and liability insurances (including war liability) with insurers acceptable to Lessor and on terms and in amounts acceptable to Lessor with the following limits and/or deductibles:

Hull Value:	MSN 0001 US\$ 79,575,000 MSN 0002 US\$ 84,680,000 Reducing annually by 3%, starting on the first anniversary of the delivery date.
Maximum Deductible:	US\$ 250,000
Minimum Liability Coverage:	US\$ 1,000,000,000

The Lessee's operator policy(ies) will at all times carry aggregate limits subject to Lessor's approval, including that these are held for amounts no lower than the

aggregate
of all Lessee's leased aircraft.

Taxes

All payments by Lessee to Lessor shall be made free and clear of all taxes and duties,
withholding tax, income tax, sales, use and excise taxes and VAT. All taxes other than
those on the overall net income of Lessor in its jurisdiction of incorporation shall be the
responsibility of Lessee.

Net Lease

The Lease shall be a "net" lease. Lessee's obligation to pay Rent and to perform all of
its other obligations under the Lease shall be absolute and unconditional.

Lessee shall be responsible for all costs and expenses associated with the delivery,
possession, use, operation, ownership, return, maintenance, insurance, import/export
of the Aircraft and compliance with applicable regulations and airworthiness directives.

Assignment/Financing

The Aircraft ownership interest and Lessor's interest in the Lease and the Aircraft shall
be freely transferable and assignable and Lessor and/or owner reserves the right to
leverage its interest or to put in place such other financing or other arrangements as
Lessor or owner may consider necessary; provided that such transfer, assignment,
financing or other arrangement does not affect Lessee's quiet enjoyment of the Aircraft.

Lessee shall co-operate fully with Lessor in connection with any such transfer, assignment, financing or other arrangement, and if such transfer, assignment, financing or other arrangement is implemented after the Delivery Date, all reasonable legal expenses incurred by Lessee in connection therewith shall be reimbursed by Lessor (estimates of which shall be provided to Lessor in advance).

Transaction Expenses

Each of Lessee and Lessor shall be responsible for its own costs and expenses associated with the negotiation and completion of this transaction for the leasing of the Aircraft, including their respective legal fees.

Confidentiality

This LOI is personal to Lessee and Lessee must keep the terms of this LOI strictly confidential and not reveal them to any person other than those employees, directors, officers and professional advisers of Lessee who are responsible for analysing, negotiating and approving the transaction and who are made aware of the confidential nature of it.

Documentation

Lessor shall draft a lease agreement (the "Lease") and other documentation incorporating the terms of this LOI and other terms normal to leasing transactions (including, but not limited to, representations and warranties, conditions precedent, payment, maintenance, operational and other covenants, indemnities and events of default (including cross default and change of control) (the "Documentation").

Sanctions

To comply with sanctions introduced by the European Union, the Lease shall contain an express prohibition such that Lessee will not at any time, directly or indirectly, sell, supply, transfer, export or re-export to Russia or Belarus, or for use in Russia or Belarus, any leased equipment. Specific wording in respect of such EU sanctions will be agreed between Lessor and Lessee in the Lease.

Timetable

Lessor and Lessee agreed to adhere to the following documentation timetable or such other timetable as Lessor and Lessee may agree from time to time:

- (i) no later than 15 business days following the date of receipt of the LOI Deposit by Lessor (the "Documentation Commencement Date") Lessor will provide draft Documentation to Lessee;
- (ii) no later than 15 business days following the date of receipt of the draft Documentation by Lessee, Lessee will provide comments (if any) on the draft Documentation;
- (iii) no later than 10 business days following the date of receipt by Lessor of comments from Lessee on the draft Documentation, Lessor and Lessee will meet in Singapore to discuss and finalise the Documentation.

The Documentation will be agreed and executed no later than 60 business days after the Documentation Commencement Date or such other date as Lessor and Lessee may agree from time to time (the "Documentation Execution Date"). Lessor and Lessee agree to negotiate in good faith towards the prompt execution of Documentation on or before the Documentation Execution Date.

Enforceability

This LOI is not intended to be and does not constitute a binding or enforceable agreement. A binding commitment between the parties to this LOI will result only upon execution of the Documentation in respect of the matters set out in such Documentation, save that the provisions of the sections relating to the LOI Deposit, Confidentiality and Governing Law shall be legally binding as from signature of this LOI.

Payments

All payments to Lessor under this LOI and the Lease shall be made in immediately available US Dollars to an account notified by Lessor to Lessee.

Conditions Precedent

The obligation of Lessor to enter into the Documentation is expressly conditional upon:

- (i) receipt by Lessor and Lessee of all requisite corporate approvals as well as necessary third party consents;
- (ii) Lessor being satisfied in its sole discretion with the financial and commercial condition of Lessee;
- (iii) completion of satisfactory Documentation on or before the Execution Date;
- (iv) receipt by Lessor of the LOI Deposit; and
- (v) receipt of tax and legal opinions satisfactory to Lessor.

Validity of Terms

This LOI supersedes all previous proposals and offers and is valid for acceptance until the close of business on 1st July 2026 (Singapore time)

Governing Law and Jurisdiction

This LOI, the Lease, all other transaction documents and any non-contractual obligations arising out of or in connection with any of them, shall be governed by, and construed in accordance with, the laws of China

The parties irrevocably agree that the courts of China shall have exclusive jurisdiction to settle any dispute or claim (including any non-contractual dispute or claim) arising out of or in connection with this LOI, its subject matter or formation. Each party irrevocably waives any objection it may have to those courts on the grounds of inconvenient forum or otherwise.

No Brokers

Neither Lessor nor Lessee has engaged the services of a broker or similar representative agent for the purposes of this transaction. Each party shall represent to the other the absence of such brokers and representative agents and indemnify the other with respect to any breach of such representation.

Please confirm your acceptance of this LOI by executing a counterpart of this LOI in the space provided below and returning a signed copy to Lessor before the expiry of its validity.

Very truly yours,

Bank of China Aviation

Appendix 1: Specification and Delivery

Part A

Current Aircraft Specification

Aircraft Model Designation	B777-300er
Engine Model	GE90-115B

Engine Thrust Rating	115,000 lbs
Maximum Take Off Weight (MTOW)	159,800 kg
Maximum Landing Weight (MLW)	114,600 kg
Maximum Zero Fuel Weight (MZFW)	108,500 kg
Interior Configuration	261 Y Seats 24 J Seats 6 F Seats
Noise Category	ICAO Annex 16, Volume I
APU Manufacturer	Honeywell
APU Model	GTCP 331-500
Certification	EASA

Part B

Delivery Condition and Delivery Inspection

Delivery Inspection:	Prior to Delivery, Lessor will make the Aircraft and Aircraft Documents available to Lessee for inspection. The Delivery Inspection will include (i) an inspection of the Aircraft Documents, (ii) a complete video borescope inspection of all Engine major modules and APU, and (iii) an acceptance flight at Lessor's cost in accordance with the airframe manufacturer's recommended in-service aircraft acceptance procedures and of sufficient duration to accomplish the recommended profile, including take-off performance test and engine ground runs.
Configuration:	The Aircraft shall be delivered to Lessee in the configuration as described in Appendix 1, Part A.
Airframe:	The Aircraft will be fresh from a block C Check or C-equivalent check (including all lesser checks) in accordance with the MPD, with all items cleared for at least 8,000 Flight Hours, 1,500 Cycles and 18 months as applicable. The Aircraft, shall be freshly painted in such

	external livery as advised by Lessee. The Aircraft shall have no less than the following Aircraft Flight Manual approved operating weights: MTOW: 159,800 kg MLW: 114,600 kg MZFW: 108,500 kg
Engines:	Each Engine will have no less than 1,400 FCs and equivalent FHs based on the Previous Lessee's actual FH to FC ratio for each Engine on-condition life remaining to the next anticipated Engine Performance Restoration Shop Visit. Each Engine shall have a certified operated thrust rating of no less than 115,000 lbs (GE90-115B). No Engine Life Limited Part shall have less than 1,400 FCs scheduled life remaining. In lieu of providing Lessee with a permanent Engine meeting the above requirements at Delivery, Lessor will have the option to deliver one or more temporary engines to Lessee (each a "Lessor Temporary Engine"). Any Lessor Temporary Engine shall have a minimum expected uninterrupted on-wing life of at least six (6) months based on Lessee's expected utilisation of such Lessor Temporary Engine. No later than six (6) months following Delivery (or such longer period as agreed between Lessor and Lessee), Lessor will deliver to Lessee a permanent engine meeting the requirements above as a replacement for any Lessor Temporary Engine (a "Lessor Replacement Engine"). The Lessor will cover all costs reasonably incurred in connection with the replacement of any Lessor Temporary Engine with a Lessor Replacement Engine up to a capped aggregate amount of \$50,000.

	The Lessor Temporary Engine will be considered an "Engine" until a Lessor Replacement Engine is installed at which point the Lessor Replacement Engine shall be considered an "Engine". The Maintenance Payments provisions set out in Appendix 2 of this LOI will be adjusted to take into account any period during which a Lessor Temporary Engine is provided to Lessee in accordance with the above.
Components/Parts:	Airframe hard time and life limited components shall have not less than 7,000 FHs, 1,200 FCs or 18 months as applicable, (or 100% life, if less), of life remaining in accordance with the MPD. Each Part will be serviceable and will be supported by EASA Form 1 or FAA Form 8130-3 Certification or approved FAA / EASA equivalent.
Landing Gear:	The Landing Gear shall have no less than 24 months and 1,500 FCs life remaining to next scheduled Landing Gear Overhaul.
APU:	The APU shall be serviceable and have not more than 2,000 APU operating hours since last APU Shop Visit.
Repairs:	All repairs to the Aircraft, Engines and Parts will have been accomplished and certified to a permanent standard, in accordance with Manufacturer's published manuals, or Manufacturer's FAA or EASA approved instruction for the Aircraft, as applicable.
Airworthiness Directives:	The Aircraft shall comply with all applicable EASA airworthiness directives requiring compliance (i) prior to the Delivery Date and (ii) within 180 days and/or within 2,000 FHs and 400 FCs after the Delivery Date.

Export and Certificate of Airworthiness:	The Aircraft shall have a currently valid Export Certificate of Airworthiness issued by the relevant aviation authority. The Aircraft shall be in a condition suitable for issuance of an EASA certificate of airworthiness in the applicable category and shall meet the regulatory requirements for immediate entry into service with an AIR OPS-1 operator for the commercial transport of passengers.
--	---

Appendix 2: Maintenance Payments

1. Frequency / timing of Maintenance Payments

Aircraft Monthly Maintenance Payments

Lessee shall pay to Lessor on the twenty-seventh (27th) day of each month maintenance payments in respect of the previous month's utilisation of the Airframe, APU, Landing Gear, Engines and Engine Life Limited Parts, ("Maintenance Payments").

"Engine Life Limited Parts" or "Engine LLPs" means those Parts, defined by the Engine Manufacturer in the engine manual requiring retirement and subsequent replacement on a mandatory basis prior to or upon the expiration of the Engine Manufacturer's certified life, such life being expressed in terms of Cycles, Flight Hours, landings or calendar time.

Lessor shall be free to commingle the Maintenance Payments with its other funds generally and Lessor shall account for the different categories of Maintenance Payments in separate notional accounts.

Upon the occurrence of an Event of Default which is continuing, the Lessor may (in its absolute discretion) immediately or whenever it chooses, set-off against, use, retain, or apply all or any part of the Maintenance Payments in or towards the payment of discharge of any obligation of the Lessee or any affiliate of the Lessee.

Aircraft End of Lease Maintenance Payment Adjustments

On the Expiry Date Lessee shall pay to Lessor end of lease maintenance payment adjustments in respect of the Aircraft ("End of Lease Maintenance Payment Adjustments") as follows:

Engine LLPs

The End of Lease Maintenance Payment Adjustments in respect of each Engine LLP shall be calculated in accordance with the following formula:

$$(A / B) \times (C - D)$$

Where:

A = one hundred percent (100%) of the manufacturer's catalogue price for such Engine LLP on the Expiry Date;

B = one hundred percent (100%) of the manufacturer's total approved life of such Engine LLP on the Expiry Date in FC;

C = the Engine FCs since new of such Engine LLP on the Expiry Date; and

D = the Engine FCs since new of:

(x) such Engine LLP at Delivery where such Engine LLP was installed in the Engine at Delivery;

or

(y) such Engine LLP at the time of installation in the Engine, where such Engine LLP was installed in the Engine as a result of an Engine LLP Replacement.

If the result of the above calculation for an Engine LLP is:

i. a positive number, Lessee shall pay to Lessor that amount in respect of such Engine LLP; or

ii. a negative number, there will be no End of Lease Maintenance Payment Adjustment to be made by Lessor in respect of such Engine LLP.

Provided no default has occurred and is continuing, any balance held on the Expiry Date by Lessor in the relevant notional Maintenance Payment account for the relevant Engine LLP (less any outstanding claims for Qualifying Work) will be applied towards the relevant Engine LLP End of Lease Maintenance Payment Adjustment to be made by Lessee.

2. Maintenance Payment Rates

The maintenance payment rates ("Maintenance Payment Rates") below are based on operation in a [harsh/benign] environment based in Singapore, an assumed flight hour ("FH") to flight cycle ("FC") ratio of 5:1 (the "Assumed Ratio") and an annual utilisation of 4,700 FH (the "Assumed Utilisation").

The Maintenance Payment Rates will be adjusted accordingly where Lessee operates in a different geographical environment, on a different FH to FC ratio from the Assumed Ratio or a different annual utilisation from the Assumed Utilisation.

Engine Maintenance Payment Rate

US\$ 15,000 per Engine per Engine FH.

Engine modular split

The Maintenance Payment Rate applicable to the Engines shall be allocated on a modular basis as follows (each a "Major Module"):

- Fan & Gearbox – 13%
- IPC – 7%
- HPC, IPT, HPT and Combustor – 60%
- LPT – 20%

Lessor shall account for the Engine Maintenance Payments made in respect of each Major Module in a separate notional account.

Other Maintenance Payment Rates

Airframe 12 Year Structural	US\$20,000 per calendar month, or part thereof
APU:	US\$ 100 per APU operating hour
Landing Gear:	US\$ 10,000 per calendar month, or part thereof

Engine LLP Maintenance Payment Rate

Engine LLP Maintenance Payment rate per Engine per Engine FC shall be the aggregate of the following calculation for each Engine LLP: 100% of the current Manufacturer's catalogue price for each LLP, divided by 95% of the Manufacturer's approved life in Cycles for each LLP.

Lessor shall account for the Engine LLP Maintenance Payments made in respect of each Engine LLP in a separate notional account.

3. Escalation

The Maintenance Payment Rates are based on January 2026 dollars.

The Maintenance Payment Rates in respect of:

- a) the Airframe, APU and Landing Gear are subject to escalation of 4.5% annually on 1 January of each year;
- b) the Engines are subject to escalation of 5.75% annually on 1 January of each year;
- and
- c) the Engine LLPs are subject to escalation in accordance with, and on the issuance of, the latest revision of the Engine Manufacturer's Price Catalogue and approved life limits.

4. Qualifying Work

Lessee will give Lessor:

1. Notice periods

- a) at least sixty (60) days written notice as to the time and location of all major checks and all scheduled Qualifying Work in respect of the Airframe, APU and Landing Gear;
- b) at least one hundred and eighty (180) days written notice as to the time and location of all major checks and all scheduled Qualifying Work in respect of the Engines and Engine LLPs; and
- c) prior notification, as soon as reasonably practicable, of any unscheduled Qualifying Work.

2. Consent / workscope / performer

Prior to the commencement of any Qualifying Work (defined below), Lessee shall obtain Lessor's consent to the associated workscope definition and

shall notify Lessor of the applicable Acceptable Maintenance Performer. Lessor may, at Lessor's expense, request additional work be added to the workscope as long as such additional work does not unreasonably affect the downtime of the Aircraft.

3. Performance requirement

All Qualifying Work must be carried out by an Acceptable Maintenance Performer.

4. Payment of contribution

Following receipt by Lessor from Lessee of paid invoices and supporting documentation satisfactory to Lessor after completion of the relevant Qualifying Work and subject to there being no default under the Lease, Lessor shall pay to Lessee a contribution in respect of such Qualifying Work in accordance with the provisions below (each a "Qualifying Work Contribution")

Airframe, APU, Landing Gear and Engines

The Qualifying Work Contribution shall be the lesser of: (i) the invoice amount for such Qualifying Work, and (ii) an amount equal to the balance in the relevant notional account at the time of commencement of the relevant Qualifying Work.

A Qualifying Event Contribution for any Engine shall only apply if the Engine is not enrolled in a TotalCare Agreement.

Engine LLP Replacement

The Qualifying Work Contribution shall be the lesser of:

- (i) the invoice amount for such Qualifying Work; and
- (ii) an amount equal to the balance in the relevant notional account as at the time of commencement of the relevant Qualifying Work, and
- (iii) $(A - B) \times C$, where:

A = the number of Engine FC since new at the commencement of such Qualifying Work of the Engine LLP being removed and replaced;

B = the number of Engine FC since new at the completion of such Qualifying Work of the Engine LLP being installed; and

C = the Maintenance Payment Rate in respect of such Qualifying Work at Delivery.

If the result of (iii) above is a negative number, there will be no Qualifying Work Contribution made by Lessor in respect of such Qualifying Work.

Shortfall and exclusions

Any shortfall between the amount of the Qualifying Work Contribution and the cost of the relevant Qualifying Work shall be for Lessee's account.

Excluded maintenance work for which no Qualifying Work Contribution shall be made will be set out in the Lease (including, but not limited to, material handling costs, costs otherwise covered by warranty or insurance, and costs arising from operational or maintenance mishandling, foreign object damage, quick engine change kit maintenance, and line replaceable unit component maintenance).

Qualifying Work definitions

Below is a definition of the Qualifying Work in respect of each component:

Airframe

"Airframe 12 Year Structural Check" means the airframe 12 year check which shall include the completion of the 12 year structural tasks, system and zonal tasks in accordance with the latest revision of the MPD.

APU

"APU Shop Visit" means APU shop visit which shall include complete refurbishment or restoration of the compressor, combustion section and turbine of the APU pursuant to the procedures set forth in the then current APU manufacturer's inspection and repair manual. The workscope accomplished shall provide an airworthiness directive, life limited parts and on-condition release of no less than 5,000 APU hours and 5,000 APU cycles.

Landing Gear

"Landing Gear Overhaul" means the off-the-wing restoration of the Landing Gear involving complete disassembly of the Landing Gear to satisfy the system and structural requirements of the latest revision of the MPD.

Engine Performance Restoration Shop Visit

"Engine Performance Restoration Shop Visit" means means any overhaul, refurbishment, or restoration of an Engine which as a minimum shall include a full refurbishment of the high pressure compressor, high pressure turbine module and combustion section module, and a full refurbishment of any other module that has exceeded the soft time limit for optimal performance as

provided in the Engine Manufacturer's Engine Management Programme applicable to the Engine.

Engine LLPs Replacement

"Engine LLPs Replacement" means the replacement of Engine LLPs with new engine LLPs during an Engine Performance Restoration Shop Visit where Engine LLP removal is required due to life expiry. In other cases of Engine LLP removal, provided agreed in writing by Lessor in advance, used engine LLPs may be installed as long as the replacement engine LLP has the same or better life remaining as the Engine LLP it replaces. Notwithstanding the foregoing, in no event shall installation of a used engine LLP restrict the expected on-wing mature interval of the Engine after an Engine Performance Restoration Shop Visit or cause the exposure of an engine module which would otherwise not require exposure at the next Engine Performance Restoration Shop Visit.

5. Lessor Contribution for Qualifying Work

After completion of the first Qualifying Work after Delivery in respect of the categories of Qualifying Work outlined below, if the balance in the relevant notional account for such Qualifying Work is insufficient to cover the full amount of the invoice amount for such Qualifying Work then, subject to:

1. (i) there being no default under the Lease which has occurred and is continuing, and
2. (ii) Lessor's receipt of paid invoices and supporting documentation, in each case satisfactory to Lessor (acting reasonably),

Lessor shall make a one-time contribution to Lessee in respect of such Qualifying Work (a "First Event Contribution").

Airframe, APU and Landing Gear

The First Event Contribution in respect of the relevant Qualifying Work shall be for an amount which is the lesser of (i) $(A - B)$, and (ii) $(C \times D)$:

where:

- A = the invoiced amount for such Qualifying Work;
- 17

- B = an amount equal to the balance in the relevant notional account for such Qualifying Work;
- C = the utilisation since the completion of the last Qualifying Work or since new, as applicable, at Delivery; and
- D = the Maintenance Payment Rate applicable at Delivery.

Engine LLPs

The First Event Contribution in respect of Engine LLP Replacement shall be for an amount which is the lesser of (i) $(A - B)$, and (ii) $(C - D) \times E$:

where:

- A = the invoiced amount for such Qualifying Work;
- B = an amount equal to the balance in the relevant notional account for such Engine LLP Replacement;
- C = the number of Engine FC since new at Delivery of the Engine LLPs being removed and replaced;
- D = the number of Engine FC since new at the completion of such Qualifying Work of the Engine LLPs being installed; and
- E = the Maintenance Payment Rate in respect of such Qualifying Work at Delivery.

If the result of the above calculation for a First Event Contribution for Qualifying Work in respect of an Engine LLP is:

1. (i) a positive number, Lessor shall pay to Lessee that amount in respect of the First Event Contribution for such Qualifying Work; or
2. (i) a negative number, there will be no First Event Contribution to be made by Lessor in respect of such Qualifying Work.

In the event that any Engine Manufacturer credit is available for any portion of Engine LLP utilization, such credit shall be subtracted from any First Event Contribution for Engine LLPs calculated above.

6. Qualifying Work Alternatives

If Lessee intends or is required to complete Qualifying Work, then prior to effecting such Qualifying Work, Lessor may elect, in its sole discretion, by

giving notice to Lessee:

- a) in the case of Qualifying Work in respect of the Airframe, APU or Landing Gear, no later than thirty (30) days prior to the commencement of such Qualifying Work; and
- b) in the case of Qualifying Work in respect of the Engines or Engine LLPs, no later than sixty (60) days prior to the commencement of such Qualifying Work, to require Lessee to complete such Qualifying Work in accordance with the terms of the Lease.

Alternatively, Lessor may:

- (i) in lieu of Lessee performing an APU Shop Visit, provide a temporary replacement APU to Lessee, at Lessor's cost and expense, to be installed on the Aircraft by Lessee until redelivery, at which time Lessee will, if requested by Lessor, reinstall the original APU;
 - (ii) in lieu of Lessee performing a Landing Gear Overhaul, provide a temporary replacement Landing Gear to Lessee, at Lessor's cost and expense to be installed on the Aircraft by Lessee until redelivery, at which time Lessee will, if requested by Lessor, reinstall the original Landing Gear;
 - (iii) in lieu of Lessee performing an Engine Performance Restoration Shop Visit, provide a temporary replacement engine or engine module to Lessee, at Lessor's cost and expense, to be installed on the Aircraft by Lessee until redelivery, at which time Lessee will, if requested by Lessor, reinstall the original Engine;
 - (iv) in lieu of Lessee performing an Engine LLP Replacement, provide a part life engine LLP, at Lessor's cost and expense, to be installed in the Engine by Lessee in lieu of Lessee installing a new engine LLP; or
 - (v) discuss in good faith with Lessee an alternative arrangement in lieu of Lessee performing such Qualifying Work,
- (each a "Qualifying Work Alternative")

Lessor and Lessee shall discuss in good faith any amendments to the Lease required to reflect such Qualifying Work Alternative, including but not limited to amendments in relation to (x) Maintenance Payments, and/or (y) the performance and redelivery conditions in respect of the original equipment.

If Lessor fails to notify Lessee of its election in accordance with Paragraph 6. (a) or (b) above, as applicable, Lessor shall be deemed not to have elected a

Qualifying Work Alternative.

Appendix 3: Redelivery Conditions

This is intended to be a summary of the principal redelivery conditions. Detailed redelivery conditions shall be contained in the Lease.

Item	Condition
Redelivery inspection	Prior to the Expiry Date, Lessee will make the Aircraft and Aircraft Documents available to Lessor for inspection. The final inspection will include (i) an inspection of all of the Aircraft Documents, (ii) a complete video borescope inspection of all engine modules and APU, and (iii) an acceptance flight at Lessee's cost in accordance with the airframe manufacturer's recommended in-service aircraft acceptance procedures and of sufficient duration to accomplish the recommended profile, including take-off performance test and engine ground runs.
Weights	The Aircraft shall have no less than the following aircraft flight manual approved operating weights: MTOW: 159,800 kg MLW: 114,600 kg MZFW: 108,500 kg
Configuration	The Aircraft shall be in the same configuration as at Delivery or as otherwise acceptable to Lessor.
Paint	The Aircraft shall be freshly painted in such external livery as advised by Lessor.
Airframe	The Aircraft will be fresh from a block C Check or C-equivalent check (including all lesser checks) in accordance with the MPD, with all items cleared for at least 8,000 Flight Hours, 1,500 Cycles and 18 months as applicable.
Engines	Each Engine will have no less than 1,400 FCs and equivalent FHs based on the Assumed Ratio on-condition life remaining to the next anticipated Engine Performance Restoration Shop Visit. No Engine LLP shall have less than 1,400 Cycles scheduled life remaining.

Item	Condition
	Each Engine shall have a certified operated thrust rating of no less than 115,000 lbs (GE90-115B).
Components / parts	Airframe hard time and life limited components shall have not less than 7,000 FHs, 1,200 FCs and 18 months as applicable (or 100% life, if less), of life remaining in accordance with the MPD. Each Part will be serviceable and will be supported by EASA Form 1 or FAA Form 8130-3 Certification or approved FAA / EASA equivalent.
Landing gear	The original landing gear must be fitted to Aircraft at redelivery. The landing gear shall have no less than 24 months, and 1,500 Cycles life remaining to next scheduled Landing Gear Overhaul.
APU	The original APU must be fitted to Aircraft at redelivery. The APU shall be serviceable and have not more than 2,000 APU operating hours since last APU Shop Visit.
Repairs	All repairs to the Aircraft, Engines and Parts will have been accomplished and certified to a permanent standard in accordance with Manufacturer's published manuals, or Manufacturer's FAA or EASA approved instruction for the Aircraft, as applicable.
Airworthiness directives	The Aircraft shall comply with all outstanding EASA airworthiness directives requiring compliance (i) prior to the redelivery date; and (ii) within 180 days and/or within 2,000 FHs and 400 FCs after the redelivery date.
Export and certificate of airworthiness	The Aircraft shall have a currently valid Export Certificate of Airworthiness issued by the relevant Aviation Authority. The Aircraft shall be in a condition suitable for issuance of an EASA certificate of airworthiness in the applicable category and shall meet the regulatory requirements for immediate entry into service with an AIR OPS-1 operator for the commercial transport of passengers.
